

Alter Ego for Men Pheromones: the facts and Review

Alter Ego for men is popular **pheromone cologne** among **pheromone** users. Alter Ego regarding Males is an oil based pheromone perfume, and has become a real trendsetter in the pheromone industry. It contains (3) of the best human being pheromones available for **attracting women**. The three pheromones are Androstenone, Androstenol, and also **Androsterone**.

Androstenone -- This pheromone is found in both men and women, is mainly referred to as a **male pheromone**. Women frequently perceive men wearing androstenone as stronger as well as strong. The benefit is increased attention from the opposite sex, Studies have also shown that it may cause sexual arousal and the increase in sex tension. However, it can also trigger over-aggression together with the other adult males around you, because it creates a dominant as well as scary atmosphere.

Androsterone -- Provides the nonthreatening alpha male profile, which makes the individual appear to be much more masculine and prominent, but without the aggression/intimidation of Androstenone. Thus, androsterone makes the individual appear to be more masculine and/or dominant, but without the aggression of androstenone. This particular pheromone also creates an aura of safety, safety and trustworthiness normally associated with a much more peaceful alpha male.

Androstenol -- Androstenol Comes Into Two Types

Alpha isomers and beta isomers. The alpha and beta do not have anything to do with the particular pheromone projecting a good alpha atmosphere. Both seem to cause chattiness and friendliness. It can also increase sexual attractiveness as well and it is commonly referred to as a great "icebreaker" pheromone. The particular alpha isomer produces a friendly atmosphere, which makes the user much more approachable for women. Androstenol also generates a great feeling of youth as well as health, which can help to build a youthful notion with regard to the elderly.

Androstenol also produces an aura of youth and health, which usually can help to create an impression of reproductive fitness, which is attractive. The primary documented a reaction to Androstenol or Androstenol containing products has been an increase in chattiness and also friendliness from both sexes, but as stated before it may increase sexual attractiveness also. It has been referred to as a good "ice-breaker" pheromone.

“
