

Pheromone Chemistry Sets

Making your own **pheromones** is definitely something that should not be taken on by a newbie. However, with a fair amount of research blending together your pheromones is quite possible. Better yet, there is a significant cost-savings if you are planning on producing pheromones in large quantities.

Love-Scent provides a "Pheromone Chemistry Set" in addition to all of the pheromones you might at any time need each sold separately. Furthermore they are going to offer pocket atomizers for having and dispensing the engineered goods. Cover-Scents can be obtained in a variety of scents for example vanilla, sandalwood, lavender, etc. When blending together your personal pheromones it is best to use these off traffic cover-scents because the smell of a commercially engineered cologne or perfume is going to be changed once a pheromone is introduced into the mixture.

You decide to buy your own pheromone chemistry set it will cost you around \$180 and will include Androstadienone, Androstanone, Estratetraenol, Androstenone,, Androstenol, and Estriol.

Androstenone-is a Steroid that can be Found in Both Men and Women Perspire and Pee Glands

There are two different and also distinct genotypes that may cause **Androstenone** to have a odor. One kind may describe the particular smell as an unpleasant sweaty smell which may be reminiscent of urine. However the other type can describe to be able to be quite pleasant like a flower. In a small amount, this pheromone is essentially hidden in order to humans.

Estratetraenol is often a chemical substance that is only manufactured by women and there is simply no current scientific investigation in which links this particular pheromone back for their estrogenic outcomes.

- **Androsterone** is a steroid hormone that is made I the liver from the normal metabolic rate of testosterone.
- This pheromone was first isolated in 1931 simply by Adolf Friedrich Johann Butenandt as well as Kurt Tscherning through distilling human urine.

PheromonesAndrostenoneSex PheromoneAndrostadienoneMaking

- Androstenol is really a **sex pheromone** that can be found in **human sweat** glands.
- The organic smell is frequently associated with sandalwood and Androstenol is found in truffles.
- Pigs tend to be attracted to these kinds of chemicals and as a result are able to search them up from their deep underground hideaways.

Estriol is one of the three main estrogens made in the **human body** and is only made in substantial quantities when a women is pregnant.
